

PRESS RELEASE

Zwijndrecht, 23 January 2018

Heerema Fabrication Group awarded EPCI contract by Tulip Oil

Tulip Oil Netherlands Offshore B.V. has awarded Heerema Fabrication Group (HFG) an Engineering, Procurement, Construction and Installation (EPCI) contract for the Q10-A unmanned offshore platform.

Koos-Jan van Brouwershaven, CEO of Heerema Fabrication Group, states: “We are very pleased with this award from Tulip Oil, and the collaborative way in which we are working together with our client. This project is a good example of HFG’s competence to develop a project from the client’s functional requirements through to the final delivery offshore. We will perform the full platform FEED and EPCI in one continuous program, rather than the traditional multi-stage approach. This enables a fast-track delivery program, resulting in lower execution risk.”

The topside of the Q10-A platform will have a weight of approximately 500 tonnes. The jacket will have a weight of around 600 tonnes and will stand in 21 meters of water. The Q10-A platform will be installed late 2018.

The Q10 gas field is located 20 km offshore the Netherlands in a shallow water environment. The Q10-A platform will be tied back to the P15d platform.

About Heerema Fabrication Group

Heerema Fabrication Group (HFG), headquartered in Zwijndrecht, the Netherlands, is a leading engineering and fabrication contractor for complex offshore structures to the global oil and gas and energy-related industry. HFG owns three large production locations, two of which are situated in the Netherlands (Vlissingen and Zwijndrecht) and one in the United Kingdom (Hartlepool). In addition, HFG owns a fabrication facility in Poland (Opole) and in-house engineering, specialized in offshore constructions. HFG is a Heerema Group company.
